To Whom It Concern

Re: Steve Otto Construction Company Reference

Steve Otto built our house at Rock Island in 2003/2004 and we have been delighted with both the quality of his work and the equitable manner that he conducts his business. Steve and his crew are incredibly talented craftsmen and eager to satisfy the whims of his clients. The level of creativity and willingness to explore unique architectural challenges was at a level found in only the finest builders and Steve provides these services at a very fair rate.

Any one interested in securing Steve's services is welcome to tour our home in Rock Island Farms and see first hand the construction skills of Steve Otto. We have been pleased not only with the construction phase of the work but also his follow upon the small details that inevitably need resolving after construction is complete. If you are looking for a quality custom builder you can trust to be honest and reliable, Steve Otto Construction is the right choice. We highly recommend Steve Otto to anyone interested in building a custom home.

Sincerely,

Jack Wallace
